

“Age is just a number
purpose is forever.”

At the age of 73, I founded Olive Eco Pack USA LLC with a bold mission:

To create eco-friendly, affordable dinnerware that protects both people's health and the future of our planet.

My entrepreneurial journey began in 1982, when I arrived in America with just \$25 in my pocket. From humble beginnings, I worked my way up to become a scientist at a leading pharmaceutical company.

After retirement, I turned my passion into purpose - launching businesses rooted in sustainability, innovation, and responsibility. In 2014, with the support of my beloved late wife Mira and my son Viral, I founded Plastic Plus LLC, which laid the foundation for a purpose-driven legacy.

Today, with Olive Eco Pack USA LLC, I am proud to continue that legacy by offering:

- Biodegradable, compostable dinnerware made from natural materials
- Affordable, retail-ready solutions for families, restaurants, and institutions
- Strategic partnerships with major distributors and retailers like Imperial Dade, WebstaurantStore, Costco, Walmart, Amazon, and BAPS temples worldwide
- A strong commitment to a cleaner Earth and healthier lifestyle for all

If President Biden and Donald Trump can lead nations at 75+, and Warren Buffett can guide investments at 90+, then I, too, can lead a green revolution - one plate at a time. Because when we choose wisely, we can help families save money, protect public health, and preserve nature - all in one plate.

Warm regards,
Vijay Chokshi
Founder & Chairman
Olive Eco Pack USA LLC
